

# Regional Meetings September 2024

## ENGINEERS EUROPE

In recent weeks, ENGINEERS EUROPE held its Regional National Members' Meetings hosted by our National Members of Estonia (North), Portugal (South) and Slovenia (Central), in respectively Tallinn, Lisbon and Maribor. These events provide a platform for fostering collaboration and strengthening the ties between National Members within each region. During the meetings, the National Members reported about their latest activities at national level, noted the recent developments and future activities of the Engineers4Europe (E4E) project and engaged in region-specific discussions, while exchanging best practices. These meetings foster an open dialogue and promote the active involvement in matters of common interest. They are crucial in building a more connected and impactful engineering community across Europe. Much appreciation therefore goes to all National Members who hosted the meetings and contributed to these fruitful discussions.

Tallinn, 13 September 2024

Lisbon, 20 September 2024

Maribor, 4 October 2024
